

1. Visit the url given in Challenge

The screenshot shows the GitHub interface for the repository 'shivamsuyal / SuperSecureCode'. The repository is public and has 0 stars, 0 forks, and 1 watcher. The main branch is 'main'. The repository contains four files: README.md, decrypt.py, encrypt.py, and main.py, all created 2 weeks ago. The README.md file is selected, showing its content: 'SuperSecureCode' and 'Hi I'm a coder, and security sucks !!!'. The right sidebar shows the repository's metadata, including the README, activity, stars, forks, and releases.

File	Commit Message	Time
README.md	Update README.md	2 weeks ago
decrypt.py	Create decrypt.py	2 weeks ago
encrypt.py	Create encrypt.py	2 weeks ago
main.py	Create main.py	2 weeks ago

README.md

SuperSecureCode

Hi I'm a coder, and security sucks !!!

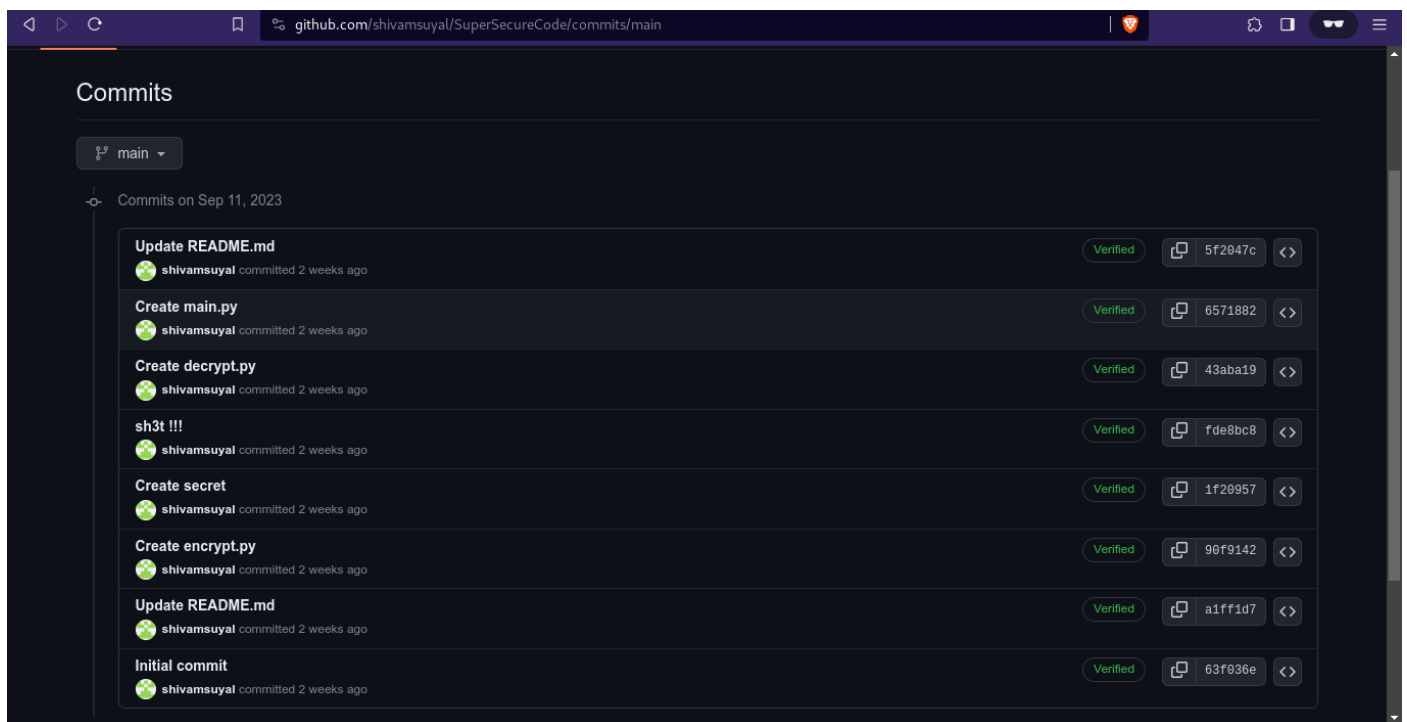

- i. It's a github repo, For those who don't know about github,
- it is a sort of online community for programmers. Where they can cooperate, share, and save software code on this website. Consider it as a location where lots of people can collaborate to develop and enhance computer programmes, making it simpler to develop spectacular software initiatives.
- ii. The best part of this github is that it automatically does version control of your code,
- As a magic book for computer code, version control is similar. If something goes wrong, you can return to an earlier page because it keeps note of every change made. In the same way that everyone can contribute to the writing of a tale without losing the plot, it enables teams to collaborate on code without ruining it.

2. Let's examine it's history, perhaps the developer saved some stuff that wasn't intended to be saved.

The screenshot shows the commit history for the repository 'shivamsuyal / SuperSecureCode'. The repository has 5f2047c commit, 2 weeks ago, and 8 commits. The commit history table shows four commits, all created 2 weeks ago.

File	Commit Message	Time
README.md	Update README.md	2 weeks ago
decrypt.py	Create decrypt.py	2 weeks ago
encrypt.py	Create encrypt.py	2 weeks ago
main.py	Create main.py	2 weeks ago

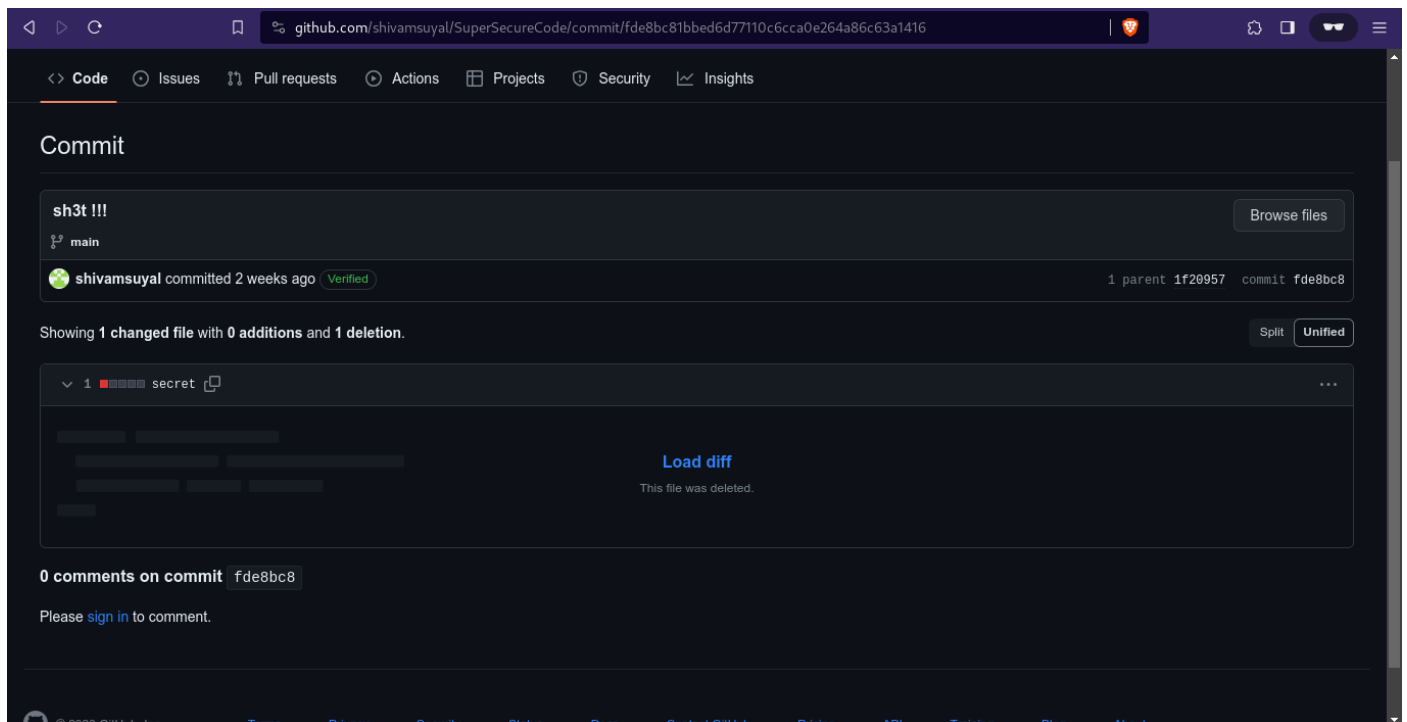

3. In github, commits are the savepoints for a code. So Click on the commits

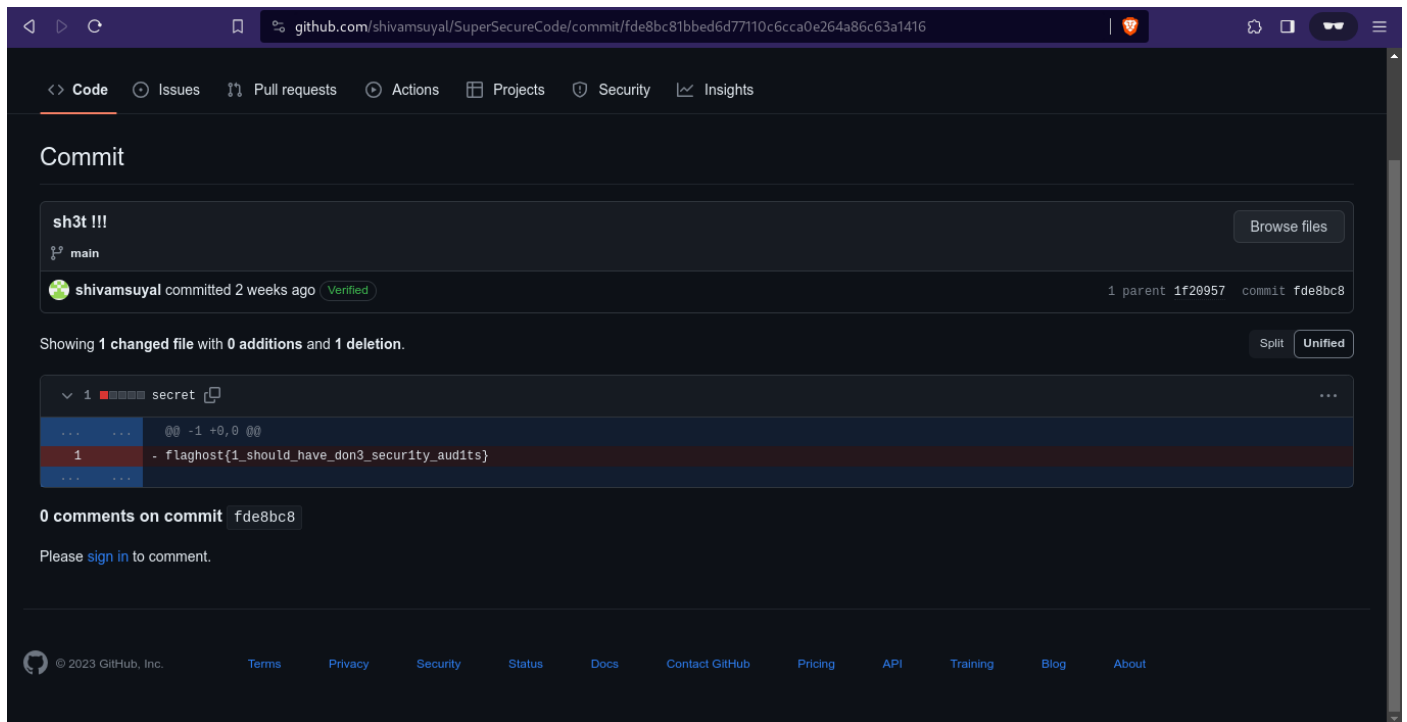

4. Now out of all these commits/savepoints sh3t !!! looks suspicious.

5. Click it.

6. Here it says that a file named secret was deleted, to see it's contents click **Load diff**.

The screenshot shows a GitHub commit page for the repository `shivamsuyal/SuperSecureCode`. The commit message is `sh3t !!!` and it was made 2 weeks ago. The commit shows 1 parent `1f20957` and the commit hash is `fde8bc8`. The diff shows 1 changed file with 0 additions and 1 deletion. The file `secret` is shown as deleted, with the diff indicating a deletion of 1 line. The diff content is `- flaghost{1_should_have_don3_security_audits}`. The page also shows 0 comments on the commit and a link to sign in to comment.
