

1. In this challenge we are given zip file, and the hint suggests to use linux commands for data parsing.

```
none@alpha:~/hck$ ls
wtf.zip
none@alpha:~/hck$
```

2. let's first check if it's really a zip file, for that we can use file command

```
none@alpha:~/hck$ ls
wtf.zip
none@alpha:~/hck$ file wtf.zip
wtf.zip: data
none@alpha:~/hck$
```

3. Nope, it's not a zip file, it's just a data file

4. let's check it's content

5. doing a normal cat we got our flag

```
CH_1GRA0BAG0E4}
file2
